(54) COSMETIC

(57)Abstract:

PURPOSE: To obtain a cosmetic having excellent protecting effects on ultraviolet rays and enhancing effects on suppression of erythema, containing a cosmetic material prepared by previously coating the surface of inorganic powder, inorganic spherical powder or organic spherical powder with an ultraviolet light absorber and bonding.

CONSTITUTION: A cosmetic containing a cosmetic material prepared by previously coating the surface of inorganic powder (e.g. zinc oxide, kaolin or talc), inorganic spherical powder (e.g. spherical calcium silicate or spherical silica gel) or organic spherical powder (e.g. nylon powder or crystal cellulose) with an ultraviolet light absorber (e.g. benzoic acid-based, salicylic acid-based, cinnamic acid-based or benzophenone-based ultraviolet light absorber) and bonding. The weight ratio of the powder and the ultraviolet light absorber in the cosmetic composition is preferably 95:5-60:40, especially 80:20-70:30. The amount of the cosmetic material added is preferably 2-60wt.% based on the total amounts of cosmetic. The cosmetic has excellent ultraviolet light protecting effects.
